✎ ORIGINAL DETAILS

Good Day Sir,

Respected sir

Subject: I hereby update to Sir perusal on the below milestones attained towards AI4Bharat TTS Webpage development.

As per Mr.Thulasidharan instruction, I have successfully explored AI4Bharat Text-to-Speech and completed the following:

Step	Description	Status
1	Installed the required software to run AI4Bharat TTS	Done
2	Noted that AI4Bharat only provides a backend interface, so content must be added via the source code	Done

3	Developed a webpage interface for the backend using React and JavaScript	Done
4	Current features of the webpage interface:	Done
	- 6 language selection options	
	- Voice change button	
	- Text input box	
	- Generate audio button/icon	
	- Play button	
	- Playback speed control	
	- Download button	

Note: Mr.Tulasidharan would like to explore the developed frontend by accessing it. Since the TTS is hosted internally as of now, I request Sir's advice to host it on the public temporarily and revoke it back Sir. Will follow as instructed by Sir.

Thank you, sir
